Acupuncture and Chinese herbal medicine is a holistic medical system with thousands of years of clinical research, development, and treatment. Licensed acupuncturists and classical Chinese herbalists, otherwise known as practitioners of Classical Chinese Medicine (CCM), use the non-invasive Chinese medicine modalities of this time-tested medical lineage to help millions of people get well and stay healthy.

When a patient seeks CCM care, and is accepted as a patient for such care, it is essential for both patient and practitioner to be working toward the same objectives in order to prevent any confusion or disappointment.

The main objective of CCM care is to determine where there are imbalances in the body as they relate to Chinese medicine theory. When the flow of qi (pronounced "chee", or vital energy flowing through the body) is disrupted, illness and disease may occur. An imbalance in any of the body channels coursing qi can cause a decrease in the body's innate ability to heal itself and express maximum health potential.

Once imbalances are detected, various treatment modalities may be employed to correct these imbalances. Your practitioner will make you aware of the modalities that will be utilized during your treatment. Any health condition(s) or disease(s) presented by the patient will be treated according to the parameters of CCM only, and the treatment will be related only to the quality and balance of qi.

The ONLY practice objective is to detect and correct imbalances within the channels that course qi using acupuncture, Chinese medicine, and/or herbal CCM techniques.

Patients will be advised if a non-acupuncture related, or otherwise unusual, finding is encountered during the course of treatment. However, licensed acupuncturists are not primary care providers, and it is recommended that you are under the care of a primary care provider when seeking acupuncture and Chinese medicine care for the attainment of proper biomedical diagnoses. If advise, diagnosis, or treatment of those unusual findings is desired, patients will be advised to seek a qualified health care professional.
